LOCATION & ACCESS

PARIS 18th, AN ICONIC DISTRICT

THE 18TH, AN ARRONDISSEMENT
VISITED BY MILLIONS OF TOURISTS,
PROVIDING A STRONG CULTURAL
AND ECONOMIC DYNAMIC

THE 18TH, AN ICONIC PARISIAN ARRONDISSEMENT

The building is located at 8-10 rue de Livingstone, in Paris' 18th arrondissement.

Built on the Butte Montmartre, this district is both very Parisian and very touristic.

This trendy area is iconic in Paris, attracting the latest retail, cultural and bistro concepts, popular with both Parisians and tourists.

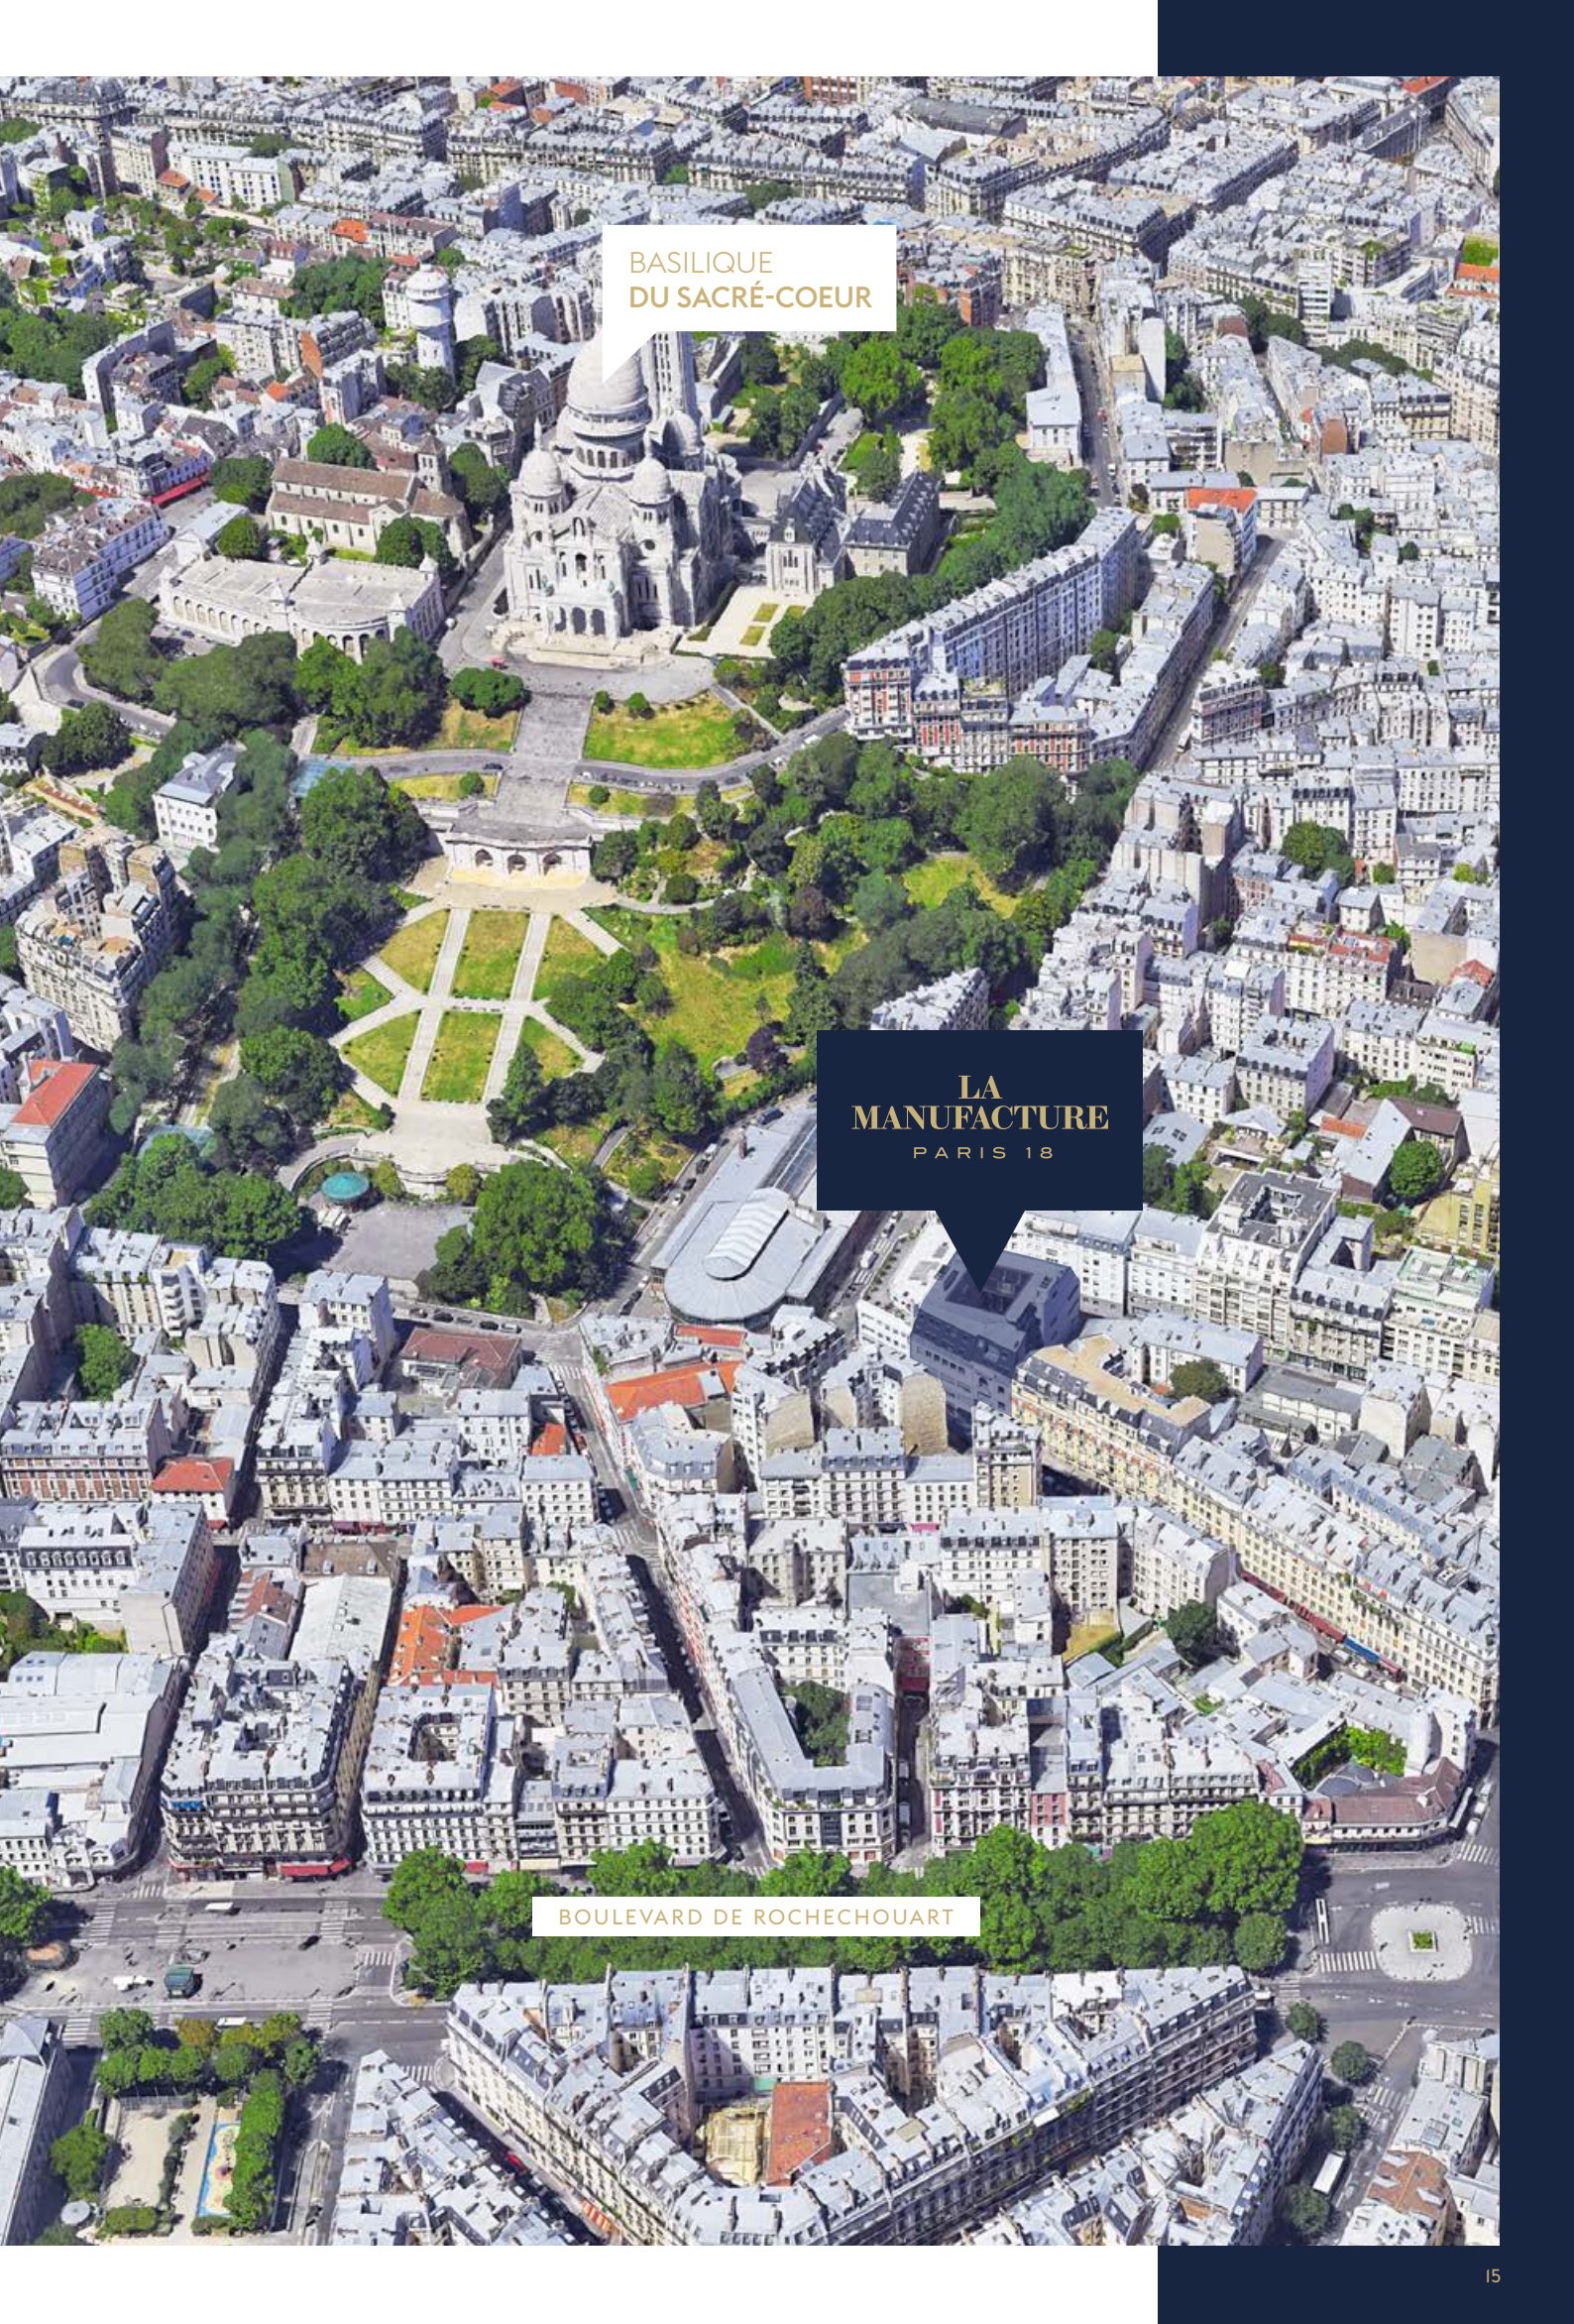

A SECTOR UNDERGOING SIGNIFICANT CHANGE

The district benefits from leading cultural, retail and tourist surroundings and is continually undergoing change to improve its appeal.

Several ongoing and recently completed projects are driving this mixed-use district, transforming it into an appealing place to be for its residents and the companies that choose to locate there.

LA MANUFACTURE: A PRESTIGIOUS BUILDING STEEPED IN HISTORY

LA MANUFACTURE WAS COMPLETELY REDESIGNED IN 2014 BY THE ARCHITECT JACQUES MOUSSAFIR, WITH THE ASSISTANCE OF THE PRESTIGIOUS INTERIOR DESIGN AGENCY, HUMBERT POYET

IT TOOK ALMOST 2 YEARS TO RESTORE THE ASSET

Built in 1922, with the interior architect Paul Dupré-Lafon for the Weill family, the building is in the Art Deco style and was initially an industrial building before evolving over time.

Originally built with two floors above ground and a basement level, the property was subsequently extended twice: first by one floor in 1937 and then by a two further floors and an additional basement level in 1957.

In 2014, extensive work was undertaken such as the demolition and reconstruction of the top two floors and works to enlarge the space on the inner courtyard with a glazed metal structure.

The architect also ensured that windows were created on the top floors to provide exceptional views of the Sacré-Coeur basilica and the famous Parisian rooftops.

Although the building has adopted a more contemporary style, it still retains some of the original features, such as the lift with its Dupré-Lafon grille and the historic office of Jean-Claude Weill (grandson of the founder of Weill), which has been preserved in its original state.

LA MANUFACTURE OFFERS EXCEPTIONAL
SERVICES, HIGH-END MATERIALS
AND EXCELLENT CLEAR HEIGHTS

A REMARKABLE BUILDING

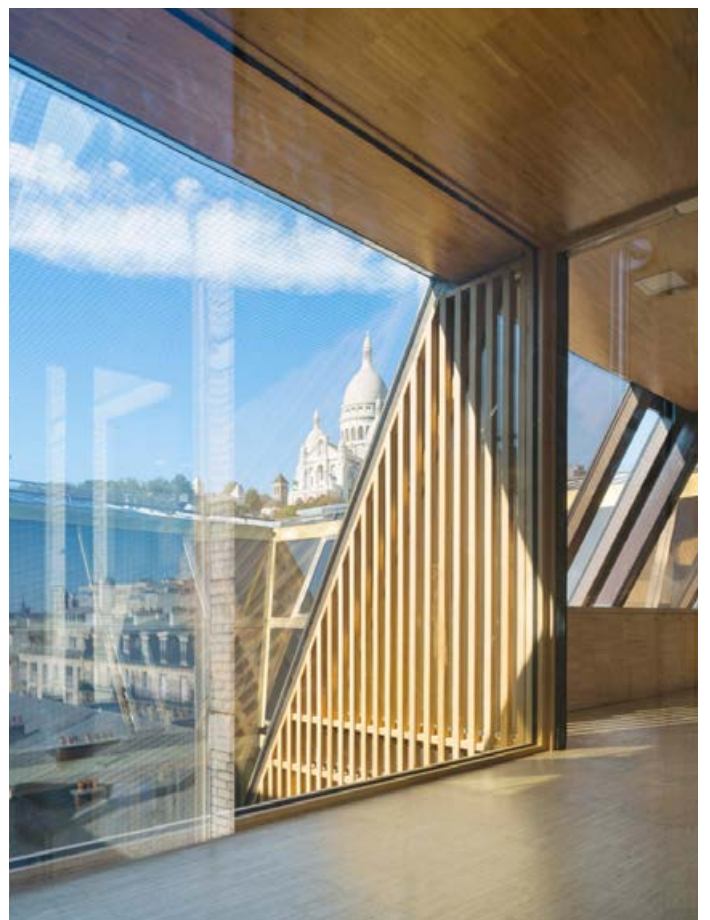

THE BUILDING IS STRUCTURED
AROUND AN INTERIOR COURTYARD

THE GLAZED INTERIOR FACADES
PROVIDE LIGHT WELLS THROUGHOUT
THE OFFICE SPACE, BRINGING
LUMINOSITY AND TRANSPARENCY

La Manufacture is a Freehold office building with two retail units on the ground floor. It has 4,783 sqm of lettable space over two basement levels, a ground floor and five upper floors.

This building has a main façade at 8 rue de Livingstone and a secondary façade on rue Pierre Picard, next to the “Halle Saint-Pierre” market. In a subtle alliance between Art-Deco and contemporary, it has façades with a strong visual identity in white stone on the Livingstone side and in white brick on the Pierre Picard side.

THE OFFICE FLOORPLATES COMPRISE ON AVERAGE 660 SQ M AND PROVIDE EFFICIENT AND FLEXIBLE SPACE WITH NATURAL DAYLIGHT

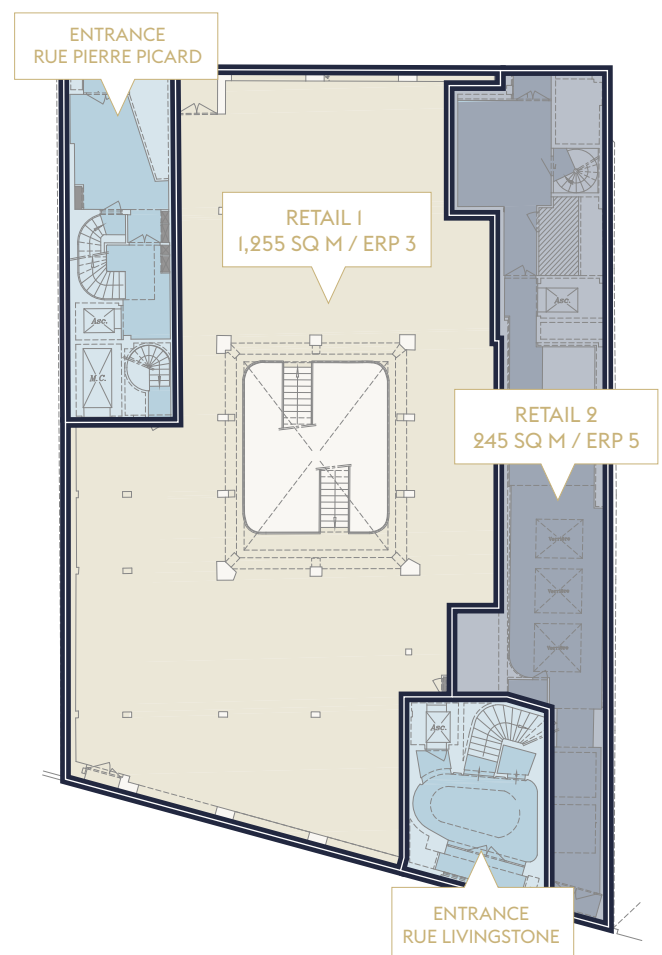

A FLEXIBLE AND COHERENT ASSET

THE TWO ENTRANCES GIVE ACCESS TO
ENTRANCE HALLS WHICH HAVE THEIR
OWN LIFT AND STAIRCASE, MAKING
THE BUILDING EASILY DIVISIBLE

Vertical circulation is provided by three lifts, one of which serves basement level -2 to the 5th floor, one the ground floor to the 5th floor (on the Livingstone side) and the third one from basement level -2 to the 3rd floor (on the Pierre Picard side).

The 1,255 sq m and 245 sq m floor retail units are on the ground floor and 2 basement levels, and each have a goods lift and a lift serving all floors. The two units are dual aspect and classified as 3rd and 5th category premises accessible to the public (ERP).

The building has a capacity of 1 person/12 sq m office space.

A FULLY REDESIGNED AND REFURBISHED BUILDING

La Manufacture underwent an ambitious programme of works between 2014 and 2016 aimed at refurbishing the building, including:

- Creation of additional retail space on the ground floor and basement level -I
- Change of use of craftsmen premises into offices from the 1st to the 5th floor with creation of floor space (floor area created - 633 sq m)
- Modification of the façades and roofs onto the courtyard and small courtyard
- Widening of the building onto the courtyard by 1.20 m and on the courtyard for the floors under the roof
- Redesign of the building's circulation system
- Modification of the roof windows onto the streets
- Thermal insulation of the building

Receipt of the declaration of completion and conformity of the works on 22/12/2015
